

I am very concerned about the status of this historical dwelling and its significance to the immediate community and beyond.

Seems to me this is an opportunity for the village, college and inns of Aurora to work together for real historical preservation.

Both dwelling and especially land.

I would imagine there is archeological significance buried on the property. NYS protects burial grounds. There is potential for human remains interred there.

The home is the first sign of welcome in the quaint village. It could be repurposed for many different things, a home, a living history center, museum, finger lakes welcome facility with space to rent for meetings, etc

Aurora has very few historical buildings remaining. The time is now to act and save and protect.

Thank you.
