

Hello,

It was recently brought to my attention that the board of trustees is trying to limit the amount of Airbnb/rentals in the village. This would be a great detriment to the people of Aurora as well as their families. I'm not just talking about the people who are renting their houses out, but for the people who are coming home to Aurora that need a place to stay. I am one of those said people. My family has been living in Aurora for many years and recently I got married and when I asked to reserve rooms at the inns for my guests, I was turned away, they said that the rooms were for wedding guests of the inn only. I therefore had to find housing for 250 people. If we didn't have Aurora mainstays we would have been camping out on our wedding night. Not only were the houses that we rented immaculate but they were also perfectly located and perfect for our family and friends to be together in. Jacci made everything that much more accommodating for us since it was a local wedding and really helped us achieve all of our goals.

I think it's important to have these homes available as another option to the inns and I would hate to see them go.

Thank you for your consideration,
Jessica Jordan
