

Historian's report, October

Correspondence: The "Seven to Save" nomination of the Wells College campus by Andrew Roblee of the Preservation Association of Central New York (PACNY) involved coordination among several groups interested in providing support for this effort; I have assisted with this coordination and will be adding a letter of support. (This program is described

In addition, the DRI program mandates approval of projects involving designated historic properties by the State Historic Preservation Office (SHPO) before monies can be awarded. In Aurora, four buildings involved in projects are Contributing Structures to the National Historic District, plus one site that constitutes a Setting. I have corresponded with SHPO to find out when this review should take place.
